CORE SKILLS

Frontend

React, Next.js, TypeScript,
JavaScript, HTML, CSS, Tailwind
CSS, Zustand, Vite, Phaser 3

Backend & Database

Java, Spring Boot, Spring Security,
ASP.NET MVC, C#, PHP, Node.js, SQL
Server, MySQL, MongoDB, REST API,
Stored Procedures

Web Development

WordPress, WooCommerce, Custom
Plugins, Custom Shortcodes, AJAX,
Authentication & RBAC, Responsive
UI

System & Deployment

IIS, VPS, Hostinger, Cloudflare,
DNS, SSL, Git, GitHub

Tools

Mongoose, Discord.js, Axios, JSZip

EDUCATION

Greenwich University

Information Technology | 09/2019 -
03/2024 | GPA 3.38 / 4.0

CERTIFICATES

Duolingo English Test 95 / IELTS
5.5 equivalent

Became a Fresher - DevPlus Campus
| December 24th, 2022

PROFESSIONAL EXPERIENCE

Salesoft Online (ECO3D Portal)

04/2026 - Present

Full-Stack Web Developer | Java Spring Boot, React (Vite), SQL Server

- Developed Salesoft Online, a Java Spring Boot + React (Vite) business portal backed by SQL Server, serving internal staff and external CTV/reseller accounts.
- Designed and implemented a CTV account lifecycle with role-based access control (Marketing vs Approver roles), replacing a single-tier admin flow with a multi-stage contact-and-approval workflow.
- Diagnosed and fixed a Spring Security @AuthenticationPrincipal binding bug that caused silent null principals for non-employee accounts across multiple controllers.
- Resolved an ID collision risk between employee and reseller identities in a cart table shared with a legacy desktop POS system by designing a safe ID-namespacing scheme.
- Integrated Google reCAPTCHA v2 to block spam on a public inventory-check endpoint, and replaced an inaccurate stock-quantity workaround with a legacy stored procedure.
- Built CTV login analytics and a sales dashboard aggregating order count and revenue per reseller from existing order data, without adding new database tables.

ECO3D Web Development (WordPress / PHP)

06/2024 - Present

Full-Stack Web Developer / Technical Lead

Websites: kinggoggles.com, vuason.com, scba.vn, sudecons.vn, thamcachdien.vn, popa.vn, hachico.com.vn, gmggloves.com, honeywell-safety.vn, giayantoan.net, gangtaydien.com, kingprosafety.com, promask.vn

- Developed custom features and maintained 13 production company and brand websites using WordPress, PHP, JavaScript, HTML, CSS, and MySQL.
- Built custom WordPress plugins and shortcodes for product catalogs, search/filter systems, product detail views, modals, and dynamic UI components.
- Implemented AJAX-based product search, filtering, and dynamic content loading without full page reloads.
- Integrated REST APIs and wrote database queries to connect product and business data; implemented user authentication and access control in custom WordPress features.
- Extended WooCommerce, Flatsome (UX Builder), and Elementor with custom PHP and JavaScript where standard theme features were not enough.
- Debugged and resolved production issues and optimized website performance, with supporting technical SEO improvements.
- Deployed and configured sites on Hostinger with Cloudflare, DNS, and SSL.
- Translated business requirements into technical solutions and led task assignment for interns on the web team.

ECO3D Internal Admin System (ASP.NET MVC)

06/2024 - 03/2025

Full-Stack Web Developer | ASP.NET MVC, C#, SQL Server, IIS

GitHub: <https://github.com/GnoughPTV/Eco3d>

- Developed an internal admin system and business websites with ASP.NET MVC, C#, JavaScript, HTML, CSS, and SQL Server, including authentication, access control, product data management, and responsive admin UI.
- Deployed applications to VPS servers and configured IIS Manager application pools, bindings, and SSL.
- Maintained SQL Server databases, including user accounts, backups, restores, and connection troubleshooting.
- Configured Cloudflare CDN and DNS, monitored VPS CPU, RAM, disk usage, and availability, and debugged production issues.

AutoRok 2023

12/2023 - 05/2024

Frontend Developer | React, i18next, JavaScript

GitHub: <https://github.com/GnoughPTV/autorokwebsite>

- Developed website interfaces with React, JavaScript, HTML, and CSS, focusing on clean UI and responsive layout.
- Built multilingual user interfaces with React and i18next.

TECHNICAL PROJECTS

Playable Ads Studio UI

2026

No-code Playable Ads Builder | Next.js, React, TypeScript, Zustand, Phaser 3

GitHub: <https://github.com/GnoughPTV/Playable-Ads-Studio-UI>

- Built a no-code editor for UA playable ad prototypes with Next.js, React, TypeScript, Zustand, Tailwind CSS, Phaser 3, and JSZip.
- Developed editor UI components: dashboard, template gallery, visual scene editor, properties panel, layer management, asset manager, and phone preview.
- Managed editor state with Zustand and implemented a runtime preview for actions, CTA, replay flow, score, timer, scene transitions, and template logic.
- Added project validation and a ZIP export pipeline generating a standalone HTML/CSS/JS runtime, assets, project.json, manifest, and README.

UA Playable Games Lab

2026

HTML5 Playable Ad Prototypes | Vite, TypeScript, Phaser 3

GitHub: <https://github.com/GnoughPTV/UA-Playable-games-lab>

- Built four HTML5 playable ad prototypes with Vite, TypeScript, Phaser 3, HTML, CSS, and JavaScript.
- Implemented game interaction logic: tap and drag controls, drag-and-drop merge, collision detection, projectile targeting, enemy HP, rewards, timers, end cards, CTA, and replay flow.
- Created a standalone HTML5 ZIP export with JSZip and followed a Git workflow with feature branches, semantic commits, version tags, a CHANGELOG, and a test plan.

Valorant Stats Discord Bot

2022 - 2023

Node.js, Discord.js, MongoDB, Mongoose, Axios

GitHub: <https://github.com/GnoughPTV/valorant-stats>

- Built a Discord bot that fetches Valorant player statistics from a REST API using Node.js, Discord.js, Axios, and node-fetch.
- Implemented commands for competitive, unrated, recent match, agent, weapon, and map stats, plus Discord-to-Valorant account linking stored in MongoDB.

Enterprise Management Project

03/2023 - 05/2023

Full-Stack Developer | 6-person team

GitHub: <https://github.com/GnoughPTV/Comp1640>

- Designed the UI and connected frontend with backend for employee management, announcements, and social media-style internal communication features.

Unity 2D Game Project

07/2022 - 10/2022

Game Logic Developer | Unity 2D, C#

- Implemented game logic and character animations in Unity 2D with C# and JavaScript across multiple team projects.
